

**Fun and Free Online Courses for School
Students!**

British Council Summer School Online Course

Dear Parent,

We consider it our core responsibility to ensure your child makes the best of their time at home. How about giving them the best ever online learning experience in the comfort and safety of your home?

Aligning with this thought, we would like to introduce free Summer courses especially curated for children between ages of 7 to 17 by the British Council – World's English Experts!

Designed by experts, Summer School 2020 activates your child's learning through fun activities. This year our courses are based on science projects, **Micro:bit® coding, theatre, crafts, physical activities and debates**, with content adapted to each age group. Your child will make tangible progress, learning to express themselves with confidence in English and developing life skills that prepare them for the future.

Children enrolled in our Summer School will:

- improve their English and 21st century skills and grow in confidence
- get challenged in critical thinking and grow their creativity
- be inspired by working with peers on a series of creative projects
- get specially trained teachers who engage through internationally tested methodologies that improve learning.
- Experience five themes in five weeks –Imagine, Discover, Create, Invent and Move!

So, what are you waiting for? Give your child a strong foundation and build a lifelong experience of independent learning. Register your child for Summer School 2020 now and experience one FREE week of classes!

To register your child for Summer School 2020 (ages 7 to 17), click here https://www.britishcouncil.in/english/courses-children/summer-school-yl?utm_medium=email&utm_source=emails
